

CHOOSE Agresso Students & QL-e

DID ROEHAMPTON FIND THE RIGHT SYSTEM

"The Roehampton University out an extensive and intensive evaluation of potential suppliers and their products when seeking a replacement for the existing Student Records System. Finally, the University selected Agresso Students from Agresso.

We considered that the Agresso Students application contained the functionality we required to move our administrative processes forward and that the operation of the system was intuitive making excellent use of Graphical User Interface technology. We also felt that, from this competent basis, the product contained the functionality to provide an excellent tool to enable the University as a whole to exploit the potential of the information contained in the system.

The company has responded well to specific Roehampton issues and has an exciting development approach to the exploitation of the emerging information management technologies".

DR JOHN KING— Management Information Systems Manager

Agresso is delighted to welcome Roehampton University to our rapidly growing customer base of Higher Education Institutes who are changing from other suppliers to the integrated Agresso solution.

With approximately 6,700 students and four faculties: Arts and Humanities, Education, Social Services and Sciences. With an ever changing modular degree programme Roehampton University found they had out grown the functionality of their existing Student Record system and therefore entered the process of assessing the systems and suppliers available in the education market place.

REQUIREMENTS

After careful consideration with regards to the viability and stability of a future Student Records System, Roehampton decided that it should have the following features

- A transparent database,
- MS Office integration,
- advantages offered by the incorporated use of web technology
- user flexibility to the access & manipulation of data and information

All of these requirements are features of the Agresso Students solution provided by Agresso whose focus is on a web enabled and component based application. This flexible, user friendly, integrated solution has been designed to meet the needs of the complex modular structure that Universities such as Roehampton have to be able to manage effectively, especially with separate modules which are able to focus & concentrate on specific key areas.

Roehampton had to be assured that the system not only met their academic needs but that it was also considered highly by industry standards, and has the ability to operate in its core business areas.

The platform independent product, boasting cross platform stability, flexible report writing features and dynamic links with MS Office products such as Excel gave Agresso a natural headstart in Roehampton's search for a replacement system.

CHOICE Why Agresso?

After thoroughly considering a range of suppliers, what was it that pushed Agresso to cross the line and win Roehampton over?

With the current success rate of the Agresso product suite, Roehampton were impressed not only with its functionality but with Agresso's willingness to enhance Agresso and tailor it specifically to meet the University's complex, but essential, requirements.

Agresso Students Features:

- Total modular assessment & progression facility
- completely integrated Nursing & Teacher training placement module
- fully integrated modular structure
- integrated Graduation & Conferment
- integration to Best of Breed systems
- flexible modular curriculum
- on-line view of enquiries, admissions, registration, enrolment statistics & student activity

Agresso is one of the leading software houses, providing systems for student, financial and HR management in the education sector.

We offer implementation, consultancy, training, project management and support – all subject to TickIT/ISO 9001 accreditation.

User Groups are held to provide a useful forum for discussions on future product developments and enhancements—lending itself to customer-driven product development.

QL-e building upon the Agresso Student Management System

QL-e has been designed as a native intranet application allowing it to be distributed to a wide variety of management, teaching and support staff throughout the institution and through firewall technologies to external bodies and staff through inherent security.

'Quick Letter' functionality is available as a direct output from the student detail screen (see opposite). This facility opens a new word processing document and inserts the relevant student detail i.e. address, name allowing the user to simply enter the text body of the letter before printing and sending to the student.
